Subject: Microsoft Settlement

To Whom this Matter Concerns,

I oppose the current resolution to the Microsoft Anti-trust case. It does nothing to address the problem of Internet browser compatibility issues. Currently Microsoft is giving away tools which make web pages offensive to users with browsers other than Internet Explorer. In many cases these sites actually cause the 'other' browsers to crash completely. Out of frustration the user is forced to use Internet Explorer to view these webpages. And Microsoft has taken over one more user. Microsoft is clearly using their

Monopoly to make as many web pages as they can useless in anything other than Internet Explorer. I do not know of anything more I can do except write this letter to you.
